

Frontend Web Developer

You will join our Spatial Experience Team, responsible for the MapsIndoors frontend ecosystem, consisting of the JavaScript SDK, web applications, and Content Management System. As part of this team you will share the responsibility for creating exceptional user experiences and robust frontend solutions that serve millions of end-users worldwide.

The role

You will be part of a diverse team with a variety of skills, each contributing to the overall success. Team effort will be a key element of your work day, and as our new team member you will

- work with a team of highly engaged engineers who take pride in shipping resilient code on time
- own features from beginning to end, managing complexity, and engaging directly with stakeholders to make sure it's built right
- contribute well-tested code to create the best possible user experience for internal teams and external developers building with MapsIndoors products
- uphold our high standards for engineering and product quality and help your colleagues do the same

Your work includes

- building features for our web-based MapsIndoors products that have an impact on millions of end-users
- help some of our world-renowned customers implement MapsIndoors
- building features for our CMS that have a direct impact on the efficiency of internal teams and external users alike
- improving our testing processes, architectural considerations, and being the web product champion

Your profile

You have a relevant degree in Web Development and have 3+ years of work experience. Besides your ability to work independently on your own assignments, it is important that you are a team player. We value knowledge sharing and view problem-solving as a collective responsibility, and encourage everyone to seek solutions within the team and help each other out.

On a professional level, we would like you to have experience with

- JavaScript and TypeScript
- Web Components, CSS, SCSS
- Angular and React
- HTTP and REST interfaces
- Jest or similar test frameworks
- Git
- Scrum (or other agile frameworks)

Other experience that would be a bonus:

- Mapbox GL JS, Google Maps JS API
- Being able to drive a feature from the beginning to the end
- Take the design lead position, write Software Design for features to be developed

On a personal level, you

- Have strong communication skills, both verbally and in writing
- Are keen on learning new technologies, frameworks and ways of working
- Work both independently and in close collaboration with the teams to ensure we reach our common goals
- Are innovative and quality-conscious
- Have a proficient English level

Your expectations

You can expect a job with a lot of exciting professional and personal challenges. Your effort will make a difference for clients around the world, where our platform plays a central role in regards to indoor mapping, indoor positioning, and in the integration with various software and hardware

technologies.

As an organization MapsPeople consist of 80+ dedicated employees who represent more than 20 different nationalities.

In MapsPeople we work together and pull together as a team. Team spirit and diversity are some of the cornerstones that make up our company culture. Our informal and dynamic atmosphere as well as our modern office facilities leave room for creativity as well as contemplation. We believe that is how you get the best working environment.

We offer a compensation package that matches your qualifications as well as flexitime, lunch, retirement- and healthcare plans.

About MapsPeople

MapsPeople is a world-leading provider of an indoor mapping platform. We connect people and buildings and partners through dynamic indoor maps and real-time data visualizations, empowering occupants to make better decisions. We power a wide range of smart building technologies, including wayfinding, room and desk booking, occupancy, positioning, and much more.

We partner with large and innovative businesses that provide smart building solutions to help them increase their product value, grow their business, and reach our goal of mapping every smart building in the world - we've already mapped more than 25,000 of them.

MapsPeople works on a global scale with office locations in Austin (Texas), Bucharest (Romania), Copenhagen (Denmark) and Aalborg (Denmark). We offer you a flexible setup with the possibility to work from one of our modern office locations in a hybrid working form.

Let's map the built world together.
