# Technical Digital Building Designer

Do you excel in combining creativity with technical expertise to design and implement digital building solutions? We're looking for a motivated Technical Digital Building Designer who thrives on working with CAD data and creating innovative digital building solutions. Join us at MapsPeople to shape the future of digital building design through our flagship platform, MapsIndoors.

As a Technical Digital Building Designer, you will become an integral part of our internal map digitization team covering spatial data as a service and regular indoor mapping team dedicated to delivering world-class digital building solutions for large partners around the world. You will leverage your technical skills and creative mindset to interpret floor plans, process CAD data, and design user-friendly solutions.

## Your main responsibilities will be to:

- Prepare and process CAD data for seamless integration to our platform
- Create innovative digital building solutions that meet customer specifications
- Digitize and manage geospatial databases for various projects
- Quality assuring digital building solutions before handover
- Work closely with project managers and clients to develop custom data sets
- Design workflows to improve delivery efficiency and system performance
- Actively participate in team discussions and initiatives to improve product functionality

## Your profile:

- 2+ years of working experience in QGIS and ArcMap
- Practical experience with design software such as AutoCAD
- A degree in Geography, Architecture, Civil Engineering, Technical Design, or a related field
- Proficient in English with excellent communication skills
- Strong attention to detail and the ability to organize tasks independently

## Nice to have:

- Other GIS software skills and programs
- Experience in reading floorplans
- Experience with outsourcing partners
- Solid IT skills and a technical mindset
- A team oriented approach, driven by a passion for innovation and creativity
- Ability to excel in a casual, dynamic team setting

## As benefits, we offer:

- Pleasant working environment in our office at Flæsketorvet in the center of Copenhagen
- Great colleagues
- Cross cultural experiences
- Private healthcare subscription
- Pension scheme
- Access to staff canteen
- Flexible working hours
- Hybrid working model

## Who we are

MapsPepole is a world-leading provider of indoor mapping through our flagship product 'MapsIndoors'. We connect people and buildings through dynamic indoor maps and real-time data visualizations, empowering occupants to make better decisions.

MapsIndoors powers a wide range of smart building technologies, including wayfinding, room and desk booking, occupancy, positioning, and much more.

We partner with large and innovative businesses that provide smart building solutions to help them increase their product value, grow their business, and reach our goal of mapping every smart building in the world - we've already mapped more than 25,000 of them.

MapsPeople works on a global scale with office locations in Austin (Texas), Toronto (Canada), Bucharest (Romania), Copenhagen (Denmark) and Aalborg (Denmark). We offer you a flexible setup with the possibility to work from one of our modern office locations.

Let's map the built world together.
