

Product Designer

Job description

Do you dream about a leading role in a company that values the product experience as a key differentiator and understands why good design matters? Then this Product Designer position is just for you.

Come join the product team at MapsPeople and become an integral player in innovating the product experience. Not only will you play an important role in the usability and experience of our products, but you will also have a meaningful impact on how we create customer driven products. Our product team is a creative, positive bunch of designers and product managers, that all thrive in diving into customer problems and believe that success can only be achieved when we collaborate closely. The more diverse knowledge we bring together to work on hard problems, the stronger products we can create, and the larger impact we can foster for our customers and partners.

What you will do

- Lead customer and user interviews and create a road forward to improve our products.
- Identify and design the best possible indoor map experience for partners and customers.
- Evangelize how best-in-class experiences impact business value.
- Collaborate with engineers to raise the usability bar.
- Co-create the design system for internal and external use.

We imagine you come with

- A passion for user centric design and experience
- Solid experience in creating user insights and prioritizing improvements
- Figma and design system skills.
- A belief in iterative, experimental and agile development principles.

Your expectations

- An opportunity to shape the experience of the leading indoor mapping partner.
- Responsibility, tasks and coaching to grow and develop your career.
- A diverse international environment and social events across teams and departments.
- A collaborative and innovative work environment with a high team spirit
- Competitive salary and benefits package.

Who are are

MapsPeople is a world-leading provider of indoor mapping through our flagship product 'MapsIndoors'. We connect people and buildings through dynamic indoor maps and real-time data visualizations, empowering occupants to make better decisions.

MapsIndoors powers a wide range of smart building technologies, including wayfinding, room and desk booking, occupancy, positioning, and much more.

We partner with large and innovative businesses that provide smart building solutions to help them increase their product value, grow their business, and reach our goal of mapping every smart building in the world - we've already mapped more than 25,000 of them.

MapsPeople works on a global scale with office locations in Austin (Texas), Munich (Germany), Copenhagen (Denmark) and Aalborg (Denmark). We offer you a flexible setup with the possibility to work from one of our modern office locations or remotely from anywhere in Denmark.

Let's map the built world together.
